## **ST Kinetics Implements TITAN Technology Partners' S2V™ Methodology to Go Live with SAP® in 10 Months**

CHARLOTTE, NC - (August 31, 2009) – TITAN Technology Partners, a global provider of hosted and managed industry solutions, announced a successful go-live in just ten (10) months using TITAN's S2V™ implementation methodology at ST Kinetics, the land systems arm of ST Engineering and one of Asia's leading provider of weapons, munitions, mobility systems and specialty vehicles. The project was primed and program managed by ST Electronics (Info-Software Systems), a subsidiary of ST Electronics, the electronics arm of ST Engineering. The successful deployment represents the launch of the new Enterprise Resource Planning (ERP) System based on SAP technology to replace ST Kinetics' legacy system.

ST Kinetics worked with TITAN and ST Electronics (Info-Software Systems) to implement their new ERP system in a multi-phase approach. The initial phase that went live across five companies in the ST Kinetics group included financial, procurement, inventory management, manufacturing and sales applications.

“We are delighted with the successful implementation of the SAP Solution using ST Electronics' pCAP-PM project management and TITAN's S2V™ implementation methodologies. We are beginning to see how having the new ERP system has enhanced our business management and allowed us to serve our customers even better. TITAN brought the expertise we needed from the implementation to training to ensure our success,” stated SEW Chee Jhuen, President, ST Kinetics

“We were able to streamline business processes and to improve the way ST Kinetics operates to ensure customer service is at the forefront,” said Lok Min Chain, TITAN Executive Vice President Asia Pacific. “The new ERP system has also facilitated ST Kinetics' continual improvement in business practices and employee development.”

### **About TITAN Technology Partners**
